PHUNG TRAN HOANG THAI

Java Developer

Ho Chi Minh City, Vietnam
Phone: +84929791748 | Email: phungtranhoangthai@gmail.com | LinkedIn: linkedin.com/in/hgthaii

SUMMARY

Java Developer experienced in building and maintaining Java-based backend services for large-scale enterprise systems in government environments. Actively involved in system integration, production support and deployment activities. Known for reliability, problem-solving and maintaining stable production systems.

WORK EXPERIENCE

Business Solutions Center, Ho Chi Minh City Telecommunications (VNPT Group)

Executive Document Management System (VNPT iOffice) | *Java Developer* | *03/2023 – Present*

- Designed and developed core backend modules for a large-scale executive document management system used by government organizations
- Implemented authentication and security mechanisms including Single Sign-On (SSO) and TOTP-based multi-factor authentication
- Developed system integration modules enabling secure data exchange via centralized intermediary integration services
- Performed legacy data migration, ensuring data accuracy, integrity and searchability
- Built and maintained CI/CD pipelines using Jenkins, Docker and SonarQube, improving deployment reliability and code quality
- Actively handled bug fixing and production issues across development, testing, staging and production environments
- Collaborated with BA and QA teams to analyze requirements, troubleshoot issues and deliver stable releases

SKILLS

Frontend: HTML, CSS, jQuery, Bootstrap
Backend: Java, Spring Framework, RESTful API, Oracle PL/SQL
DevOps & System: Linux, Jenkins CI/CD, SonarQube, Docker, Proxmox
